It is considered as highly probable that the recent changes in the Italian cabinet may have had much to do with the present state of affairs. The Marquis Russin, who has assumed the Premiership, is supposed to be open to the influence of popular clamor, and to desire to receive reputation with the masses by catering to the demand of a hot-headed element in Italy. At any rate, it is felt that the present state of affairs is only temporary, and there is no disposition or intention to take hasty action on the part of this Government.
